Experienced Full Stack Developer with 3+ years in building scalable web applications using MERN, Next.js, and Spring Boot. Skilled in developing secure APIs, optimizing system performance, and deploying real-time, cloud-native solutions with Docker, AWS, and Firebase.

WORK EXPERIENCE

Graduate Assistant Web Developer | CSUDH – IT Department

Carson, CA, USA | Mar 2023 – Present

- **Implemented** real-time analytics and chat features using WebSockets (Socket.io), Firebase Realtime Database, AWS Lambda in a MERN-based web application.
- **Optimized website performance** by 40% through caching, SQL optimization, and JavaScript code refactoring.
- **Designed and developed** dynamic, responsive web pages using React.js and Next.js for 6+ departmental events.
- **Conducted** full-stack development lifecycle tasks: system design, unit testing, deployment, and documentation.
- **Collaborated** cross-functionally to troubleshoot issues, ensure timely delivery, and maintain code quality.

Full Stack Developer | IBM India Pvt Ltd

Bengaluru, India | Jun 2021 – Nov 2022

- **Developed** scalable RESTful and GraphQL APIs enabling secure, efficient communication between services.
- **Improved data performance** by 30% through database schema optimization and advanced SQL queries.
- **Containerized microservices** using Docker, streamlined CI/CD pipelines with Jenkins, Git, reducing deployment cycles by 30%.
- **Built responsive frontends** using React.js, Next.js, and TypeScript, boosting UX performance by 20%.
- **Collaborated** with cross-functional teams to deliver full-stack applications using **React.js, Node.js, and MongoDB**.
- **Delivered robust applications** with the MERN stack, applying JavaScript OOP principles and design patterns.

Jr. Web Developer | Enuke Software Pvt Ltd

Gurugram, India | Jul 2020 – Jun 2021

- **Secured** Node.js apps by implementing **OAuth2 and JWT-based authentication**, increasing data protection by 30%.
- **Integrated** third-party services (Stripe, Twilio, Firebase, AWS), enhancing app functionality and scalability.
- **Leveraged** SSR (Next.js), lazy loading, and state management to improve front-end load times and performance.
- **Developed** microservices using FastAPI and Flask, improving backend scalability by 20%.
- **Delivered** high-performance solutions with a React.js frontend and Django backend stack
- **Worked** closely with 5+ developers and cross-functional stakeholders to deliver end-to-end features within agile sprints.

Student Intern | Nagarro Software Pvt Ltd

Bengaluru, India | Jan 2020 – Jun 2020

- **Gained hands-on experience** in **Node.js** and **JavaScript**, focusing on OOPs Concepts & DSAs.
- **Built RESTful APIs** using Node.js and Express.js, improving API response times for real-time applications.
- **Developed and optimized** MERN stack web applications with secure architecture and performance tuning.
- **Designed** efficient database models in MySQL and MongoDB with query optimization for high-speed data retrieval.
- Followed **Agile methodology and Git** for collaborative version control and sprint-based development.

PROJECTS

Covid-19 Test Booking Application

Node.js, Express & MySQL

- Developed backend APIs to support remote test booking, enhancing safety and scheduling efficiency.
- Designed intuitive UI for patients to locate centers, book appointments, and receive real-time notifications.

Food Ordering Application – (Food-Hub)

Node.js, Express, MongoDB & JavaScript

- Built user authentication, menu browsing, and secure payment APIs for a seamless ordering experience.
- Integrated live location tracking and dynamic menus, elevating app interactivity and convenience.

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, TypeScript, HTML5, CSS3

Frame Works & Libraries: Node.js, NestJS, React.js, Next.js, Django, Flask, Spring Boot, MVC, Tailwind CSS, Redux, Material UI

Databases: MySQL, PostgreSQL, MongoDB, Firebase, GraphQL (SQL & NoSQL)

Tools & Platforms: Docker, Kubernetes, Jenkins, AWS, Git, SQL Server, VS Code, Eclipse, Agile/Scrum

Operating Systems: Microsoft Windows, Linux

EDUCATION

Masters in Computer Science | Cal State – Dominguez Hills

Jan 2023 – May 2025

- **Relevant Courses:** Algorithms, Data Analysis, Software Engineering, OS, Artificial Intelligence, Advanced Python

Bachelors in Computer Science | UIET, MD University

Jul 2016 – May 2020

- **Relevant Courses:** DBMS, Data Structures, Web Development, Programming in Java
